

Class 03 Outline

- Class03a Class Outline
- The *.ipynb can run in both Colab and jupyter notebook in your own PC.
- Class03d1 Demonstrations of Python framework **PyTorch (Classification)**
4 inputs, 3 outputs; cross-entropy
- Class03d2 Demonstrations of Python framework **sklearn (Regression problem)**
MLPRegressor; 1 output ; 3 outputs
- Class03d3_Iris_3_keras.ipynb **keras; classification,one-hot encode; softmax**
- Class03f1 BP algorithm for Digit classification using MNIST
keras framework; one-hot encode
- Class03f2 Breast-Cancer-Classification
- **Sleep Stage Prediction**
Class03_PSG_34CSV_MLP_baseline.ipynb
- Class03g **Assignment 2 : Digit Recognition based on MNIST**
Breast Cancer Classification
